I am a self-motivated, passionate, hardworking coder with an organized approach to meeting multiple, concurrent deadlines. I have experience developing systems and testing scripts in numerous languages. Beyond that I am cryptocurrency enthusiast, basketball fanatic, and video game lover. Constantly adding and tweaking my computer builds, generating content, and loving life!

Education

04/2021 Ottawa, ON, Canada

Biomedical & Electrical Engineering | Bachelor of Engineering Carleton University

It was here I achieved a thorough understanding of the underlying theory and concepts behind programming, biotechnology, signal processing, and image analysis. While at Carleton University I discovered my passion for data collection, statistics, and analytic work.

Work Experience

07/2019 – January 2020
Newmarket, ON, Canada

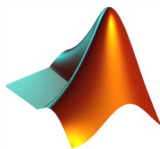

Commercial Credit Analyst Bill Gosling Outsourcing

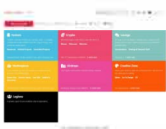

I worked to control potential client exposure with order management strategies designed to minimize credit risk and generate revenue. My work was outsourced to the client bases of several institutions including Capital One, Freedom Mobile, and Costco. I broke down and evaluated client problems, using tests, personal expertise and probing questions. It was here I conducted the financial review of assets for the purposes of settlement, closure, and payment.

Skills

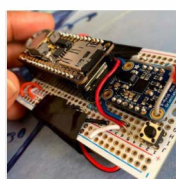

I am fluent in several programming languages, with good experience in others. I learn and master new languages quickly in both team and self-directed settings. Comfortable handling multiple projects simultaneously with little to no supervision.
